

DOWNGAUGE

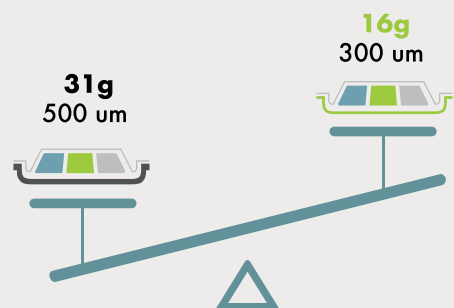

THE BRAND NEW PACKAGING SOLUTION
**TO AVOID UNNECESSARY
USAGE OF MATERIALS**

Up to 50% reduction in

- Tray thickness & tray weight
- Total packaging weight
- Ratio of plastic per kg of food product

The technology can be applied to SKIN packaging. Downgauge Technology allows you to create packaging with perfect sealing and all the characteristics and high performance of traditional packs, reducing the use of raw material while avoiding deformations and defects.

DOWNGAUGE

PLASTIC REDUCTION

is one of the **KEY PACKAGING STRATEGIES** helping food industry players meet their sustainability goals and local legal requirements.

Reducing tray weight and thickness can:

Decrease the carbon footprint impact of packaging by lower energy & water consumption.

Reduce costs in the production phase without design or efficiency compromise.

Integrate completely with Platformer[®] Plus.

Save resources and reduce raw materials consumption. High compatibility with many material suppliers.

Decrease production costs.

Reduce transport and emissions.
